EXPERIENCE

SOFTWARE DEVELOPER
QUEBEC-CANADA
Immiland Canada(May 2022 - Present)

- Design of **https://immiland.app/auth** based on the layouts received from Figma.
- Develop a calculator that allows clients to obtain an automatic contract with a price based on their personal information and the type of visa they require. The calculator can be accessed at **https://flow.immiland.app/flow/354bf321-80ff-44c2-ab1c-f4c17d9eaf95**
- Collaborate with the team to style various components of the Immiland application, such as buttons, inputs, filters, search boxes, modals, and tables.
- Conduct interviews with Immiland App users to identify the actual problems that Immiland should address, improve current processes, and prioritize the users' highest needs.
- Engage in pair programming with new coworkers.
- Develop integrations with the REST APIs of different third-party applications.
- Participate in the hiring process.

  Environment: HTML,CSS,Typescript,React-Flow,Nest.js,Node.js,Tailwind CSS, Ant Design, Docusign API, Brevo API, Digital ocean (AWS-S3 API), Stripe API, Chat GPT API, Jot Form API.

SOFTWARE DEVELOPER INTERNSHIP
PRINCE EDWARD ISLAND-CANADA
Cogsdale Corporation(Feb 2022 - Apr 2022)

- Built a Node application to automate the creation of all files needed to generate a new API endpoint. Previously, it would take a couple of hours to make an endpoint work, but using the application, it is done in 15 seconds.
- Learned how a stored procedure should be structured and all the pieces needed to obtain a 'readable' response from the API endpoints for a utility billing application (electric, water, sewer).

  Environment: Node.js,MySqlServer,Typescript,Bitbucket,Jira,Git,Agile.

PROJECTS

TO DO APP
Environment: MongoDB, Express, React, NodeJS
https://github.com/anlegana/ToDoApp/tree/master

- Built an application that allows reading, creating, deleting, and updating activities..
- Learned how to connect the front end with the back end.

CHAT APP
Environment: Socket,io , React
https://github.com/anlegana/SocketAppChat

- Learned how the communication between the server and the clients works using sockets.

SKILLS

- HTML,CSS, JavaScript, MERN stack, Java, PHP, C# .
- MySQL, SQL Server .
- Git, Jira,Aguile practices, Sourcetree, Bitbucket.

EDUCATION

COMPUTER INFORMATION SYSTEMS
PRINCE EDWARD ISLAND - CANADA

Holland College (Sep 2020 - Apr2022)

BS ELECTRICAL ENGINEERING
CARTAGENA DE INDIAS-COLOMBIA

Technical University of Bolivar (2013 - 2018)
